TECHNICAL SPECIFICATIONS

FW
FREE WORD

Our event spaces are well equipped to meet a variety of event requirements and have recently been upgraded to a high standard. They have been designed with flexibility in mind, allowing us to deliver high quality audio-visual support across the venue: whether for an intimate spoken word event in the Theatre or an open plan format with live music and speeches.

Free Word is also able to produce high quality audio and video recordings of events. Depending on the client's needs, audio recordings can be delivered as multi-track recordings or as a single stereo file. Video recordings are also available on request, incorporating presentation slides.

Please see below for a detailed list of technical equipment and services. If you have more complex requirements, equipment hire can be discussed.
